

Use Case: Complete Coffee Order

Main Success Scenario

1. Customer selects the desired coffee type and size.
2. Customer selects any desired add-ons or skips the add-on option.
3. Customer proceeds to the payment stage.
4. Customer selects a credit/debit card or mobile wallet as the payment method.
5. Payment Gateway processes and authorizes the payment.
6. System confirms that the payment was successful.
7. System prints a receipt containing the order details and loyalty points.
8. Use case ends successfully.

Alternate Flow — Payment Failed

- A1.** Payment Gateway declines the payment.
- A2.** System displays a “**Payment Failed**” message.
- A3.** Customer can either **retry the payment** or **cancel the order**.
- A4.** If payment succeeds after retrying, the system continues with the main success scenario.
- A5.** If the customer cancels, the order is cancelled and the use case ends.
